

## Pedagogy Newsletter #33

12th July 2019

Dear Colleagues,

If you are not familiar with [this website](#) already, I recommend taking a look.

The 'Learning Scientists' create great resources based on research from cognitive psychology. The materials are intended to increase the use of effective study and teaching strategies that are backed by research.

I found this particular article and accompanying image really thought provoking. It is based on the theory of [Dual Coding](#) and provides an insight into how both imagination and imagery can enhance learning.

<http://www.learningscientists.org/blog/2018/3/28-1?rq=dual%20coding>

Kind regards,

Fran Goodship

**Extra note from Ben Rogers:** I'll be booking the researchEd London and Ipswich tickets on Monday. Thank you if you've already signed up. It isn't too late for you to join us! The sign-up sheet is [here](#). The London event is on Saturday 7th September with some really great speakers (see [here](#)). The Ipswich event is on Saturday 16th November, and will have some familiar faces speaking!

Have a lovely weekend!
